

DPD-3104-59

3 June 1959

Dear Charlie,

As mentioned in my communication the installation of the fire door has been approved.

Your letter mentioned that it would be installed in such a manner as to preclude access from the outside.

In line with devising a means to ascertain whether it has been opened, I would suggest the following:

1. Glue a solid piece of white paper over the entire door frame to extend at least three (3) inches at the top and each side.
2. Paper should have a red line across the width at the same position as the panic bar on the door
3. Paper should be lettered in red with letters at least six (6) inches, "EMERGENCY EXIT ONLY".

I trust you can understand my crude drawing.
